Owl Beret

By OctoStag - octostag.blogspot.com

Supplies

- Yarn: Every yarn with a gauge of **18-21 stitches = 10cm/4inch**. You can also use a different yarn but always check the gauge and your measurements first. You'll need about **70g**.
- Needles – **3,5mm/US4 and 4mm/US 6**. You can use circular needles for magic loop or double pointed ones.
- You also need a cable needle, stitch markers, tapestry needle and scissors.

Measurements & Sizes

This pattern has only one size that could be altered if needed.
I am making the beret for a head circumference of ~55cm = 96 stitches.

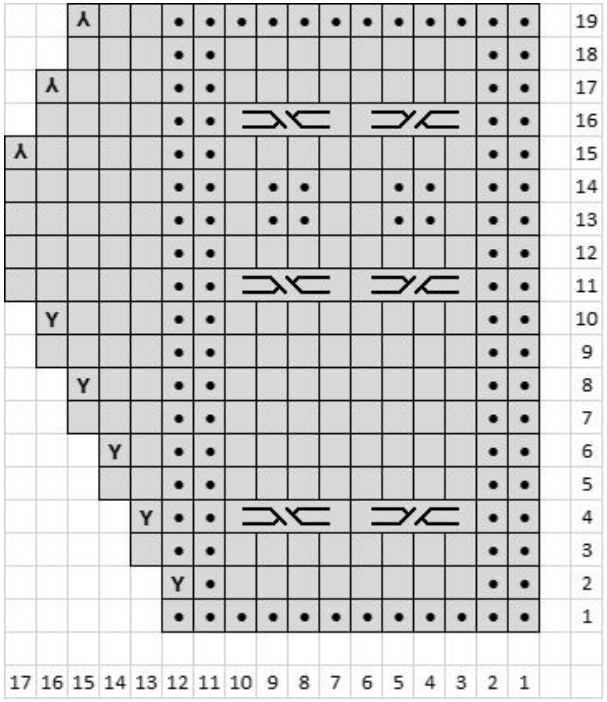
You can alter the circumference to your desired measurements by simply doing more or less pattern repeats. Or use a yarn with a different gauge.

Let's knit it!

Cast on 96 stitches with the smaller needles, connect to a round and *K1 P1* for about 1''/2,5cm.

Place a marker after every 12 stitches. These are your pattern repeats.

Change to bigger needles. Then follow the instructions on the pattern chart.



knit

purl

Y make one

λ knit 2 together

cable 4 back, by putting the 2 stitches on the cable needle behind the work

cable 4 front, by putting the 2 stitches on the cable needle infront of the work

After finishing the chart:
Row 1: Knit all stitches.
Row 2: Knit, K2Tog before every marker.

Repeat these two rows until you have only 8 stitches left.
You can either knit them together further or just pull the thread through all of them and sew them together.

Sew in the loose thread ends and maybe sew on buttons or pearls as eyes on the owls.
